

LOUTANICA™

Australia's First Nations People have recognised and harnessed the power of native plant extracts in traditional foods and medicines for over 65,000 years.

Australian native plants have adapted over centuries to survive and thrive in the harsh climactic conditions.

Louthera Australia is proudly Australian and has long used Australian Native Botanicals in the majority of our formulations.

We are delighted to launch Loutanica™ our signature blend of unique indigenous Australian potent bio-active plant extracts to our formulary. Today we can combine traditional knowledge with sophisticated scientific analysis and advanced extraction techniques which enhance the performance and validate the bio-chemical availability of these ingredients in skin-care.

Loutanica™ contains our proprietary formula of sustainably sourced native plant extracts which are grown, harvested and processed locally in Australia.

INCI

Terminalia ferdinandiana extract (Kakadu Plum), Citrus glauca extract (Desert Lime), Syzygium paniculatum extract (Lilly Pilly) Santalum acuminatum extract (Quandong)

ALERT

Contains true blue, clean, green Australian ingredients and is guaranteed to have come in to contact with Aussies.

No expressed warranties are made if you have glowing skin and start to say "G'day" after using.

PROPERTIES

- Protects against intrinsic and extrinsic aging processes.
- Powerful anti-oxidant and free radical scavenging.
- Reduces the appearance of aging signs.
- Reduces the appearance of wrinkles.
- Improves skin firmness and elasticity.
- Improves skin turnover and healing
- Anti-microbial and anti-inflammatory properties

BIO-ACTIVES

- Phyto-active compounds
- Gallic Acid
- Natural Vitamin C
- Natural Vitamin E
- Tryptophan
- Flavone Glycosides
- Ferulic Acid
- Folate
- Natural AHA
- Chlorogenic Acid
- Phenolics

TRACE MINERALS

- Manganese
- Calcium
- Magnesium

MODE OF ACTION

- Powerful stress oxidative inhibitor.
- Extracellular matrix booster and rejuvenator.

pH 5, Vegan, Gluten Free
